PROFESSIONAL SUMMARY

Proactive, results-oriented **Full-Stack Developer** with nearly **2 years of practical experience** architecting, developing, and deploying robust web applications and RESTful APIs. Specialized in engineering secure backend architectures using **Laravel & PHP** with relational **MySQL** schemas, complemented by modern reactive client interfaces built with **React.js** and the **MERN Stack (MongoDB, Express, React, Node.js)**. Demonstrated success shipping production-grade clinical portals (HMS), school enterprise ERPs, and restaurant POS applications live on **Railway Cloud**, **Vercel**, and **Netlify**. Committed to clean MVC architecture, role-based access control (RBAC), and high-availability digital solutions.

TECHNICAL SKILLS & CORE COMPETENCIES

Backend & Server Architecture (Laravel & PHP)

Laravel Framework | Core PHP | RESTful API Design | Role-Based Access (RBAC) | Eloquent ORM | Blade Templating | Middleware & Auth | MVC Patterns

Frontend Engineering (React & Modern Web)

React.js | JavaScript (ES6+) | HTML5 & Modern CSS3 | Tailwind CSS | Bootstrap | Responsive Mobile-First UI | State Management | SPA Architecture

MERN Stack & Node.js Ecosystem

Node.js | Express.js | MongoDB & Mongoose | RESTful Endpoints | CRUD API Design | Asynchronous Programming | Axios / Fetch

Databases, Cloud & Tooling

MySQL (Relational Schema) | Railway Cloud | Vercel | Netlify | Git & GitHub | Postman API Testing | Environment Secrets

WORK EXPERIENCE & ENGINEERING TIMELINE

Full-Stack Developer (Laravel & MERN Stack) | Software Development & Client Projects — 2023 – Present (Almost 2 Years)

Dera Ismail Khan, Pakistan • Remote & Freelance Development

- **Architected & Deployed Enterprise Systems Live:** Engineered production systems from concept to release, including Hospital Management (HMS), Restaurant Management (RMS), and School Portals with high-availability hosting on **Railway Cloud**.
- **Engineered Role-Based Access Control (RBAC):** Developed secure multi-tiered authentication workflows separating Administrative, Doctor, Teacher, Student, and Staff roles with custom middleware and session validation.
- **Constructed Resilient RESTful APIs:** Designed performant APIs using Laravel (PHP) and Node.js/Express, ensuring sanitized input handling, token-based verification, and optimized database queries across MySQL and MongoDB.
- **Crafted Fast, Responsive Frontends:** Built dynamic user interfaces with React.js, Tailwind CSS, and Blade templating, delivering sub-second response times and seamless mobile/desktop cross-browser compatibility.
- **Managed Continuous Cloud Deployments:** Maintained codebases via Git/GitHub version control, configuring environment variables, custom routing, and zero-downtime releases on Railway, Vercel, and Netlify.

2 Years	6 Projects	Railway & Vercel
ENGINEERING EXPERIENCE	LIVE PRODUCTION DEPLOYED	CLOUD DEPLOYMENT VERIFIED

FEATURED PRODUCTION SYSTEMS & LIVE DEPLOYMENTS

Hospital Management System (HMS)

Enterprise Portal

Live App (Railway) | GitHub

Clinical operating platform with multi-role access for Admins, Doctors, and Reception Staff.

- Engineered appointment scheduling, digital medical records, and billing ledger.
- Live in production on Railway Cloud with secure relational database schemas.

`Laravel` `PHP` `MySQL` `Railway` `REST API`

Restaurant Management System (RMS)

Operations & POS

Live App (Railway) | GitHub

All-in-one restaurant system managing dining tables, live kitchen tickets (KOT), and billing.

- Digital food menus with dynamic categories, pricing, and table reservation tracking.
- Order generation, automatic invoice calculation, and sales monitoring dashboard.

`Laravel` `PHP` `MySQL` `Railway` `REST APIs`

School Management System & ERP

Academic ERP

Live App (Railway) | GitHub

Comprehensive academic ERP digitizing school administration across 4 role-based portals.

- Role-based dashboards for Admins, Teachers, Parents, and Students with attendance analytics.
- Exam mark sheets, printable report cards, and student fee collection history.

`Laravel` `PHP` `MySQL` `Railway` `Bootstrap`

Modern Notes Application

MERN Stack

Live App (Vercel) | GitHub

Distraction-free digital notepad with real-time text note capture, tags, and search.

- Instant note CRUD, live search-as-you-type, and responsive minimalist interface.
- Live in production on Vercel with RESTful Node/Express endpoints & MongoDB storage.

`React` `Node.js` `Express` `MongoDB` `Vercel`

Weather Forecast Application

React & Live API

Live App (Netlify) | GitHub

Interactive weather analytics dashboard connecting to live meteorological REST APIs.

- Instant city search, temperature metrics, humidity, and dynamic condition icons.
- Live in production on Netlify with sub-second API fetch response.

`React` `JavaScript` `Weather API` `CSS3` `Netlify`

Property Advertisement Portal

Full Stack

Live App (Netlify) | GitHub

Real estate listing platform connecting buyers, sellers, and agents with interactive discovery.

- Property filtering by location, price, and type; seller dashboard with direct inquiries.
- Live in production on Netlify with relational database schema and responsive grid UI.

`Laravel` `PHP` `React` `MySQL` `Netlify`

Education & Academic Background

Bachelor of Science in Computer Science / IT Foundation

Strong theoretical and practical background in Object-Oriented Programming (OOP), Relational Database Management Systems (RDBMS), Data Structures, and Web Software Engineering.

Languages & Development Methodology

English: Professional	**Urdu:** Native / Fluent	**Pashto:** Native

Methodology: Agile Sprints, Clean MVC Architecture, Git Feature Branching, Code Reviews & Continuous Cloud Deployments.
